Jean Bravo

Full-stack .NET Engineer — Cloud, Containers, Applied AI

naejbravo@gmail.com | +34 677 750 689 | bravojc.com
Málaga, Spain · available immediately | linkedin.com/in/jean-bravo | github.com/naejbravo

PROFILE

Full-stack .NET engineer building and operating production systems end-to-end: solution and data-model design, ASP.NET Core and Blazor, container images published to GHCR, and cloud infrastructure on GCP, Azure and OCI with Terraform and CI/CD. Applied AI — LLM integrations and RAG — as a capability on top, not as the headline.

EXPERIENCE

Tech Lead & Full-stack .NET Developer
Jan 2026 – Present

HumanTech Software

WebRRHHpro — Multi-tenant HR SaaS (Production)

- Architected multi-tenant SaaS platform (.NET 10, Blazor, PostgreSQL, Clean Architecture) with subdomain isolation, RBAC and EF Core global query filters across 6 roles.
- Built AI-powered document classification (OCR, field extraction, auto-categorization) and 3-mode signature workflows (OTP, click, certificate). Reduced paper processes by 95% and signature turnaround by 80%.
- Designed and operate production infrastructure on GCP: Docker images published to GHCR, GitHub Actions CI/CD, Caddy, SignalR and Serilog.

Full-stack .NET Developer
May 2025 – Present

HumanTech Software

WebCAEpro — Workforce management (Multi-tenant)

- Built GDPR-compliant signature workflow with SHA-256 magic links, audit trail and PDF stamping — 100% digital compliance.
- Designed REST API for mobile time tracking with encrypted API keys and timezone-aware validation.
- Architected single codebase serving 3 business brands with isolated databases and independent SMTP/WhatsApp channels.

Software Engineer
May 2022 – May 2023

Correcto · Startup

- Built responsive web platforms with Angular and JavaScript in an agile startup environment.
- GCP deployments and cross-functional teamwork using Jira.

PROJECTS

Hermes Agent Infrastructure — self-hosted AI agent stack
2026 – Present

Personal

- Deployed and operate a 24/7 self-hosted AI agent (Hermes Agent, open source by Nous Research) on Oracle Cloud ARM64 — Docker, systemd, Cloudflare Tunnel, ~$5/month total cost.
- Persistent semantic memory with self-hosted Mem0 + Qdrant vector DB (hybrid semantic + keyword search); multi-model LLM routing via OpenRouter with automatic fallbacks across ~20 providers.
- Cloud browser automation (Browser Use API), multi-platform messaging gateway (Telegram, Slack) and cron-based scheduled automation.

EDUCATION

Full Stack Developer Program — Upgrade Hub, Madrid — 2021 – 2022

Higher Technical Certificate (ASIR) — Network Admin, IES Fuengirola N°1 — 2018 – 2020

SKILLS

.NET Solutions: C# 14, .NET 8/10, ASP.NET Core, REST APIs, EF Core, Blazor, Clean Architecture, multi-tenant, RBAC, SignalR
Cloud & Containers: Docker, GHCR (container registry), Kubernetes (working knowledge), GCP, Azure, OCI, Terraform, GitHub Actions CI/CD, Caddy, Cloudflare Tunnel, Linux/systemd
Data: PostgreSQL, MySQL, SQL Server, Qdrant (vector DB)
Applied AI: LLM integrations, multi-model routing (OpenRouter), RAG, semantic memory (Mem0), browser automation (Browser Use), OCR document classification
Security & Docs: ASP.NET Identity, RBAC, JWT, digital signatures (OTP, SHA-256, certificate), audit trails, GDPR

LANGUAGES

Spanish — Native English — B2 German — A1 (learning)
